Work Experience

Django Web Developer- Full stack

NaijaKet-Delta

March 2023 to June 2024

- I developed a backend and a Frontend using Django for an e-commerce platform.
- The website includes Authentication for users to sign-up, login, logout and reset passwords.
- It includes payment gateway for users who want to subscribe and post their products online for others to buy (an online Market space) using PayStack .
- It also includes a search functionality for users to search for their favorite product(s) available on the platform
- I used Digital Ocean cloud service for deployment

Web Developer

TechAmaka-Delta

February 2024 to February 2024

- I created a web app with the use of Django and GraphQL
- The web app was responsible for collecting hospital data from a state and storing them
- I created a frontend interface that allow users to view hospitals saved
- I created a GraphQL interface that can query the list of hospitals available in the backend database

Web Developer

Naijaharmony-Delta

May 2023 to December 2023

- I worked as a Fullstack website Developer for Naijaharmony
- I made use of Django, Django Rest Framework api, vue.js , PostgreSQL and tailwind CSS to create a robust social media platform
- It includes user authentication where users can signup and login
- It includes feed page, a message system, a component for "people you may know" and "Trends"
- I used Django as my backend connected to PostgreSQL as my database and I used vue.js as my front-end
- I created APIs that allowed me to post and retrieve data from my backend server
